

XVI IFT UAM/CSIC Xmas Workshop
IFT 15-17 December 2010

PROGRAMME

Time	Wednesday 15	Thursday 16	Friday 17
10:30 - 11:30	C. Wulz <i>First Results from the LHC</i>	E. Copeland <i>Models of Dark Energy</i>	D. Baumann <i>Ultraviolet Fingerprints of the Early Universe</i>
11:30 - 12:00	Coffee break		
12:00 - 13:00	M. Lindner <i>Neutrinos as probes of new physics</i>	N. Fornengo <i>Particles in astrophysics and cosmology: a dark connection</i>	F. Halzen <i>Twenty Thousand Neutrinos Under the Ice</i>

15:00 - 16:00	J.-P. Blaizot <i>The strongly coupled quark-gluon plasma and heavy ion collisions at the LHC</i>	H. Liu <i>Holographic non-Fermi liquids and quantum phase transitions</i>
16:00 - 16:30	Coffee break	
16:30 - 17:30	A. Pomarol <i>Elementary or Composite: The particle physics dilemma</i>	G. Servant <i>Cosmological probes of electroweak symmetry breaking</i>
