

Windows on Quantum Gravity: Programme.

Wednesday, June 18th

10:00 - 11:00	D. Dunbar <i>UV structure of $N=8$ Supergravity</i>
11:00 - 11:30	Coffee Break
11:30 - 12:30	P. Vanhove <i>Higher loop amplitudes in supergravity and string theory</i>
12:30 - 13:00	General discussion on the no-triangle hypothesis
13:00 - 15:00	LUNCH
15:00 - 16:00	M.Reuter <i>Asymptotic safety in Quantum Einstein Gravity</i>
16:00 - 16:30	General discussion on the exact renormalization group
16:30 - 17:30	A. Roura <i>Backreaction from non-conformal fields in de Sitter spacetime</i>

Thursday, June 19th

10:00 - 11:00	R. Woodard <i>Infrared gravitons can screen Λ</i>
11:00 - 11:30	J. Garriga / General discussion on de Sitter <i>Can IR gravitons screen Λ?</i>
11:30 - 12:00	Coffee Break
12:00 - 13:00	J. Garriga <i>Bigravity and Λ</i>
13:00 - 15:00	LUNCH
15:00 - 16:00	V. Mukhanov <i>Cosmological perturbations and the transplanckian problem</i>
16:00 - 16:30	General discussion on transplanckians
